Instructions for Group-work 2

You have in total 6 hours over three sessions in which to brainstorm and develop 1-3 options for an enhanced planning, reporting, monitoring and review mechanism under the Convention and the post 2020 global biodiversity framework.

Proposals should be clear, concise, realistic, and well thought-out. They should include:

- i. Proposals on planning, reporting, monitoring *and* review.
- ii. Considerations of both national and global levels and their inter-linkages.
- iii. Considerations of how existing elements under the Convention (NBSAPs, NRs, VPR, COP, etc.) should be refined.
- iv. Considerations of any additional elements or instruments, from those presented or others, that could be introduced.
- v. Considerations of how what is being proposed will help to facilitate and enhance implementation and ultimately improvements in the status of biodiversity on the ground.
